

EAMT 2026

First call for Tutorial Proposals

The European Association for Machine Translation (EAMT) invites proposals for tutorials to be held in conjunction with the EAMT 2026 conference taking place in Tilburg, the Netherlands, from 15 to 18 June with tutorials held on 15 June. We seek proposals in all areas of machine translation (see the [call for papers](#) of the main conference for the focus areas of EAMT 2026).

The aim of a tutorial is primarily to help the audience to develop understanding of particular technical, applied, and business matters related to research, development, and use of MT and translation technology.

Presentations of particular technological solutions or systems are welcome, provided that they serve as illustrations of broader scientific considerations.

We recommend that the tutorial covers work by the presenters as well as by other researchers. The submission should explain that this breadth is ensured. Tutorials should not be “self-invited talks”.

Important Dates

- Deadline for tutorial description submission: 18 March 2026
- Author notification: 24 April 2026
- Tutorial slides, abstract, bibliography and any other materials to be submitted by: 08 May 2026
- Participant registration open: 15 May 2026

All deadlines are at 23:59 CEST.

Submission Details

Tutorial proposals should not exceed 4 pages of content (plus unlimited pages for references), should be in PDF format, and should contain the following:

- A title and authors, affiliations, and contact information.
- A brief description of the tutorial content and its relevance to the machine translation community.
- Short description of the target audience and any expected prerequisite background the audience should be aware of.

- An outline of the intended tutorial structure or tentative programme, with a clear indication of whether a three-hour slot (half-day) or a six-hour slot (full day) is requested for this tutorial. These time limits do not include coffee breaks, e.g., a half-a-day tutorial in fact occupies a 3.5-hour slot (one coffee break), and a full-day tutorial occupies a 8-hour slot (two coffee breaks and a lunch break).
- Diversity considerations, e.g. use of multilingual data, indications of how the described methods scale up to various languages or domains, participation of both senior and junior instructors, demographic and geographical diversity of the instructors, plans for how to diversify audience participation, etc.
- Reading list. Work that you expect the audience to read before the tutorial can be indicated by an asterisk. Recommended papers should provide breadth of authorship and include work by other authors, and work from other disciplines is welcome if relevant.
- For each tutorial presenter, a one-paragraph statement of their research interests and areas of expertise for the tutorial topic, as well as experience in instructing an international audience.
An estimate of the audience size for the tutorial. If the same or a similar tutorial has been given before, include information on where any previous version of the tutorial was given and how many attendees the tutorial attracted.
- A description of special requirements for technical equipment.

Tutorial proposals should be submitted as PDF files to the [EasyChair EAMT 2026 page](#) (submission type: EAMT2026 Tutorials).

Submissions should be formatted according to the templates specified below. Anonymisation is not required. Submissions should be no longer than 4 pages (excluding references).

Templates for writing your proposal

Use one of the templates below to prepare your submission:

- [LaTeX](#)
- [Cloneable Overleaf template](#)
- [Word \(version 2\)](#)
- [Libre Office/Open Office](#)
- [PDF](#)

Evaluation Criteria

Each tutorial proposal will be evaluated according to its clarity and preparedness, novelty or timely character of the topic, and instructors' experience.

Tutorial Instructor Responsibilities

Accepted tutorial presenters will be notified by 24 April 2026. They must then provide abstracts of their tutorials for inclusion in the conference registration material by the specific conference deadlines. The description should be in two formats: (a) an ASCII version that can be included in email announcements and published on the conference website, and (b) a PDF version for inclusion in the electronic proceedings (detailed instructions will be provided). Tutorial speakers must provide tutorial materials by 13 May 2026. The final submitted tutorial materials must minimally include copies of the course slides and a bibliography for the material covered in the tutorial.

For each tutorial being held at EAMT 2026, we offer free registration to the conference for one tutorialist.
