## Abstract

This document contains the instructions for preparing a camera-ready manuscript for the papers in the proceedings of EAMT 2026. The document itself conforms to its own specifications, and is therefore an example of what your manuscript should look like. Authors are asked to conform to all the directions reported in this document.

## 1 Credits

This document is derived from the instructions for EAMT 2022, which was the latest in a long line of adaptations: EAMT 2009, EAMT 2011, EAMT 2012, EAMT 2014, EAMT 2015, EAMT 2016, EAMT 2017, EAMT 2018, EAMT 2020, Coling 2008, ACL-07, Coling/ACL-06, EACL-06, ACL-05 and EACL-03. All these were based on the formats of earlier ACL and EACL Conference proceedings. Those versions were written by several people, including John Chen, Henry S. Thompson and Donald Walker.

## 2 Introduction

The following formatting instructions are directed to authors of papers accepted for publication in EAMT 2026 proceedings.

See also the conference website<sup>1</sup> for additional advice and information regarding submission. All authors are required to adhere to these specifications. Authors are required to submit

their papers in PDF (Portable Document Format). The proceedings will be printed on **A4 paper**. Authors from countries in which access to word processing systems is limited should contact the guest organizers, Tilburg University, at [eamt2026@tilburguniversity.edu](mailto:eamt2026@tilburguniversity.edu) as soon as possible.

## 3 General Instructions

Manuscripts must be in two-column format. Exceptions to the two-column format include the title, authors' names and complete addresses, which must be centered at the top of the first page, and any full-width figures or tables (see the guidelines in Subsection 3.5). **Type single-spaced.** Start all pages directly under the top margin. See the guidelines later regarding formatting the first page.

See Section 4 for information on the maximum number of pages.

If you are using Overleaf ([overleaf.com](https://overleaf.com)), you can use this document as a template for your submission. Simply create your own copy of this read-only document by clicking on the main Overleaf menu (see Figure 1) at the top left of the document editing window and then click on "Copy Project". You can then modify the newly created document.

### 3.1 Electronically-available resources

This description is provided in  $\text{\LaTeX}2\epsilon$  (`eamt26.tex`) along with the  $\text{\LaTeX}2\epsilon$  style file used to format it (`eamt26.sty`) and an EAMT bibliography style (`eamt26.bst`); and in PDF format (`eamt26.pdf`). These files are all available at <https://eamt2026.org/calls-for-papers>.

There is also a Microsoft Word (`eamt26.docx`) and LibreOffice/OpenOffice (`eamt26.odt`)

© 2023 The authors. This article is licensed under a Creative Commons 4.0 licence, no derivative works, attribution, CC-BY-ND.

<sup>1</sup><https://eamt2026.org/>

**Figure 1:** How to clone the LaTeX template in Overleaf

document template available at the same URL. The use of these style files, which have been appropriately tailored for the EAMT 2026 proceedings, is mandatory.

### 3.2 Format of Electronic Manuscript

You should submit your electronic manuscript in Portable Document Format (PDF). This format can easily be generated from L<sup>A</sup>T<sub>E</sub>X2e using commands such as `pdflatex` or `rubber`, or from your Overleaf project, or from your word processor (LibreOffice, OpenOffice, Microsoft Word). Please make sure that you select the option of including *all* the fonts. Before sending it, test your PDF by printing it from a computer different from the one where it was created. Note that some word processors may generate very large PDF files, where each page is rendered as an image. Such images may reproduce poorly. In this case, try alternative ways to generate the PDF file.

It is of utmost importance to specify the **A4 format** (21.0 cm x 29.7 cm) / (8.3 in x 11.7 in) when formatting the paper.

Print-outs of the PDF file on A4 paper should look like the present document, which conforms to the formatting requirements. *Note that in order for your paper to print correctly, you should disable centering and scale-to-fit options on your printer.* If you cannot meet the above requirements about the production of your camera-ready paper, please contact the programme chairs as soon as possible.

### 3.3 Layout

Format manuscripts two columns to a page, in the manner these instructions are formatted. The exact dimensions for a page on A4 paper are:

- Left and right margins: 2.5 cm (1 in)
- Top margin: 2.5 cm (1 in)
- Bottom margin: 2.5 cm (1 in)

- Column width: 7.7 cm (3.1 in)
- Column height: 23.7 cm (9.4 in)
- Gap between columns: 0.5 cm (0.2 in)

### 3.4 Fonts

For uniformity, Adobe's **Times Roman** font should be used. In L<sup>A</sup>T<sub>E</sub>X2e this is accomplished by putting

```
\usepackage{times}
\usepackage{latexsym}
```

in the preamble. If Times Roman is unavailable, use **Computer Modern Roman** (L<sup>A</sup>T<sub>E</sub>X2e's default). Note that the latter is about 10% less dense than Adobe's Times Roman font. In LibreOffice and OpenOffice, you can use a free font such as **Nimbus Roman**.

### 3.5 The First Page

Center the title, authors' names and affiliations across both columns. Do not use footnotes for affiliations. Do not include the paper ID number assigned during the submission process. Use the two-column format only when you begin the abstract.

**Title:** Place the title centered at the top of the first page, in a 15-point bold font. Long titles should be typed on two lines without a blank line intervening. Approximately, put the title at 2.5 cm (1 in) from the top of the page, followed by a blank line, then the authors' names, and the affiliations on the following line. Do not use only initials for given names (middle initials are allowed). Avoid capitalizing all letter last names. The affiliation should contain the author's complete address, and, if possible, an electronic mail address. Leave about 2 cm (0.75 in) between the affiliation and the body of the first page.

**Abstract:** Type the abstract at the beginning of the first column. The width of the abstract text should be smaller than the width of the columns for the text in the body of the paper by about 0.6 cm (0.25 in) on each side. Center the word **Abstract** in a 12-point bold font above the body of the abstract. The abstract should be a concise summary of the general thesis and conclusions of the paper. It should be no longer than 200 words.

**Text:** Begin typing the main body of the text immediately after the abstract, observing the two-column format as shown in the present document. Use 11-point font for text. **Indent** when starting a new paragraph, except for the first paragraph following each heading.

### 3.6 Sections

**Headings:** Type and label section and subsection headings in the style shown on the present document. Use numbered sections (Arabic numerals) in order to facilitate cross references. Number subsections with the section number and the subsection number separated by a dot, in Arabic numerals. Do not number subsections. Use 11-point font for subsection headings and 12-point font for section headings.

**Citations:** Citations within the text appear in parentheses as (Gusfield, 1997) or, if the author's name appears in the text itself, as Gusfield (1997). Citations in parentheses should not be used as linguistic phrases; for example, instead of “(Gusfield, 1997) argues that . . .” say “Gusfield (1997) argues that . . .”. Treat double authors as in (Aho and Ullman, 1972), but write as in (Chandra et al., 1981) when more than two authors are involved. Append lowercase letters to the year in cases of ambiguity as in (Gledson and Keane, 2008a). Collapse multiple citations in parenthesis as in (Gusfield, 1997; Aho and Ullman, 1972) and like this for multiple citations with the same-named author: (Tam and Schultz, 2006; Tam and Schultz, 2007; Gledson and Keane, 2008a; Gledson and Keane, 2008b).

**References:** Gather the full set of references together under the heading **References**; place the section before any Appendices, unless they contain references. Arrange the references alphabetically by the first author's last-name, rather than by order of occurrence in the text, and invert the first-name and last-name of the first author (only). Provide as complete a citation as possible, using

a consistent format, such as the one for *Computational Linguistics* or the one in the *Publication Manual of the American Psychological Association* (American Psychological Association, 1983). Use of full names for authors rather than initials is preferred. Use full names for journals and conferences, not abbreviations (for example “45th Meeting of the Association for Computational Linguistics”, not “ACL07”).

The L<sup>A</sup>T<sub>E</sub>X2e and BibT<sub>E</sub>X style files provided roughly fit the American Psychological Association format, allowing regular citations, short citations and multiple citations as described above.

**Appendices:** Appendices, if any, directly follow the text and the references (but see above). Letter them in sequence and provide an informative title: **Appendix A. Title of Appendix.**

**Acknowledgements:** the acknowledgement section should go as a last section immediately *before the references*. Do not number the acknowledgement section.

### 3.7 Footnotes

Put footnotes at the bottom of the page and use 9-point font. They may be numbered or referred to by asterisks or other symbols,<sup>2</sup> which should always follow punctuation as shown in this paragraph. Footnotes should be separated from the main text by a line.<sup>3</sup>

### 3.8 Other formatting guidelines

Camera-ready papers should follow commonly accepted typographical conventions. Here are some of them:

- Use an en-dash (L<sup>A</sup>T<sub>E</sub>X “–”) for language pairs: “English–Swahili”, not “English-Swahili”.
- Use an en-dash (L<sup>A</sup>T<sub>E</sub>X “–”) for number ranges: “3–4”, not “3-4”.
- When typesetting math, function or variable names with more than one letter should be typeset in Roman (using `\mathrm{ }`), not italics: “distance(*a*, *b*)”, not “*distance*(*a*, *b*)”.

<sup>2</sup>This is how a footnote should appear.

<sup>3</sup>Note the line separating the footnotes from the text.

- When typesetting subscripts which are words or word abbreviations, make sure you typeset them in Roman (using `\mathrm{}`): “ $A_{\max}$ ”, not “ $A_{max}$ ”
- Avoid informal abbreviations such as “10k” for “10,000” or “4M” for “4,000,000” or “4 million”.
- Separate quantities from units: “4 GB”, not “4GB”. Use an unbreakable space ( $\LaTeX$  “~”)

### 3.9 Copyright

EAMT 2026 requires a copyright licence statement, which leaves copyright with the authors under a Creative Commons Attribution-NoDerivatives 4.0 International licence. This should be inserted as an unnumbered footnote on the first column of the first page. The  $\LaTeX$  style file and the Word and LibreOffice/OpenOffice templates add the copyright statement automatically. Refer to the style file for instructions to change this if required.

### 3.10 Graphics

**Illustrations:** Place figures, tables, and photographs in the paper near where they are first discussed, rather than at the end, if possible. Wide illustrations and tables may run across both columns. Make sure your illustrations have good contrast and resolution by printing them in a black-and-white printer. Do not use illustrations for text examples, and make sure that any text in your illustration is not affected by aliasing and has a font size larger than 8 points. Try to avoid colour illustrations as they may reproduce poorly; if you still need them, take colour-blind people in consideration when designing them.

**Captions:** Provide a caption for every illustration; number each one sequentially in the form: “**Figure 1.** Caption of the Figure.”, “**Table 1.** Caption of the Table.” Type the captions of the figures and tables below the body, using 9-point text, with the parts shown in bold.

## 4 Length of Submission

Unless otherwise specified, the maximum length is

- 10 (ten) pages for papers submitted to track *research: translators and users*,
- 6 (six) pages for papers submitted to track *implementations and case studies*, and
- 2 (two) pages for papers submitted to track *projects/products*.

The page limit should be observed strictly. All illustrations, references, and appendices must be accommodated within these page limits, following the formatting instructions given in the present document.
